

**Timeline:**

Week - 1	<b>Introduction to Data Structures/ Number Theory</b> <ul style="list-style-type: none"><li>• Definition of data structures and abstract data types,</li><li>• Static and Dynamic implementations, Examples and real life applications;</li><li>• Searching Algorithms: Straight Sequential Search, Binary Search, Tertiary Search.</li><li>• Number theory and Mathematical Problems, based on base conversions, prime number and sieve, Divisibility and large numbers, Catalan numbers etc.</li></ul>
Week - 2 and 3	<b>Recursion and structures/classes</b> <ul style="list-style-type: none"><li>• Introduction to recursion, Divide and Conquer Algorithm.</li><li>• Euler trees formation, and system-stack memory diagrams formations for recursive functions.</li><li>• Infix, postfix, prefix representation using recursion, Conversions, Applications.</li><li>• Introduction to structures and classes. And an introductory level of OOPS.</li></ul>
Week - 4	<b>Queues, Lists and Stacks</b> <ul style="list-style-type: none"><li>• Definition and Array based implementation of Queues / Lists.</li><li>• Linked List implementation of Queues / Lists,</li><li>• The Stacks : Definition, Array based implementation of stacks, Linked List based implementation of stacks,</li><li>• Circular implementation of Queues and Singly linked Lists,</li><li>• Straight / circular implementation of doubly linked Queues / Lists,</li><li>• Priority Queues, Applications.</li></ul>
Week - 5	<b>Running Time and Bit Manipulation</b> <ul style="list-style-type: none"><li>• e, AveTime Complexity and Big-oh-notation,</li><li>• Running Times, Best case, worst casrage Case,</li><li>• Factors depends on running time,</li><li>• Evaluating Time Complexity for recursive functions.</li><li>• Bit Manipulation: Introduction to bits and binary number system, and applications of bit</li><li>• Bitwise operators and logical operators using bits.</li><li>• Tricks and tips with bits, and important tactics.</li></ul>
Week - 6	<b>Searching and Sorting</b>

	<ul style="list-style-type: none"> <li>• Introduction, Searching Algorithms: Straight Sequential Search, Binary Search</li> <li>• Sorting by exchange, selection, insertions : Bubble sort, Selection sort, Efficiency of these algorithms;</li> <li>• Shell sort, Performance of shell sort,</li> <li>• Merge sort, Merging of sorted arrays &amp; Algorithms;</li> <li>• Quick sort Algorithm analysis,</li> <li>• sortHeap: Heap Construction, Heap sort, bottom – up, Top – down Heap sort approach.</li> </ul>
Week - 7 and 8	<b>Trees</b> <ul style="list-style-type: none"> <li>• Definition of generic trees and Binary trees,</li> <li>• Properties of Binary trees and generic trees, and their Implementation,</li> <li>• Tree Traversal pre-order, post order, In- order traversal,</li> <li>• Binary Searching over the trees.</li> <li>• Heaps and their equivalence structure with trees,</li> <li>• AVL Trees,</li> <li>• Implementations of the above</li> </ul>
Week - 8 and 9	<b>Graphs</b> <ul style="list-style-type: none"> <li>• Definition of Undirected and Directed Graphs and Networks,</li> <li>• The Array based implementation of graphs,</li> <li>• Adjacency matrix and Adjacency list</li> <li>• The Linked List representation of graphs,</li> <li>• Graph Traversal – Breadth first Traversal, Depth first Traversal,</li> <li>• Shortest path Algorithm, Examples: Dijkstra, Floyd Warshall and Bellman Ford.</li> <li>• Minimum spanning trees, Examples: Prims and Kruskal +algorithm.</li> <li>• Tables : Definition, Hash functions,</li> <li>• Implementations and Applications of the above.</li> </ul>
Week - 10 onwards	<b>Project Development Phase Started:</b> <ul style="list-style-type: none"> <li>• Project Functioning and Strategy discussion</li> <li>• Dividing the tasks, among the participants.</li> </ul>
After the project, only if we still have time.	<b>Dynamic Programming</b> <ul style="list-style-type: none"> <li>• DP: Introduction to dynamic programming, overlapping subproblems and optimal substructures.</li> <li>• Approaches for dynamic programming: Memoization and Tabulation techniques.</li> </ul>
